1. This application is in condition for allowance except for the following formal matters:

Please see the following statement.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

2. The drawings are objected to because Figs. 1-3 are too crowded, and should be one drawing per page. Figs. 8-10 having multiple pages, are improper, and should be one drawing per figure number. Figures 8-10 do not carry any patentable material since intended use do not carry any patentable weight. The description of the drawings in the specification should be amended accordingly. Formal drawings are required. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the

remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

3. Claims 1-16 are allowed.
4. The claims are allowable over the prior art for at least the reason that the prior art fails to reasonably teach or suggest in claim 1 that a string instrument comprising a plurality of long frets connected with the top of the body and running horizontally along the length of the body and parallel to the upper and lower bridges, directly below the upper bridge whereby the long frets are distanced so as to produce sounds that are half note apart; a plurality of tuning boxes attached to the bottom of the body, made of a body, a nut, a tailpiece, a clapper, and a grooved metal covering, wherein the clapper is fixed on the nut and placed in the groove of the metal covering as set forth in the claimed combination.
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shih-yung Hsieh whose telephone number is 571-272-2065. The examiner can normally be reached on 7:00-3:30.
